

Blog Review

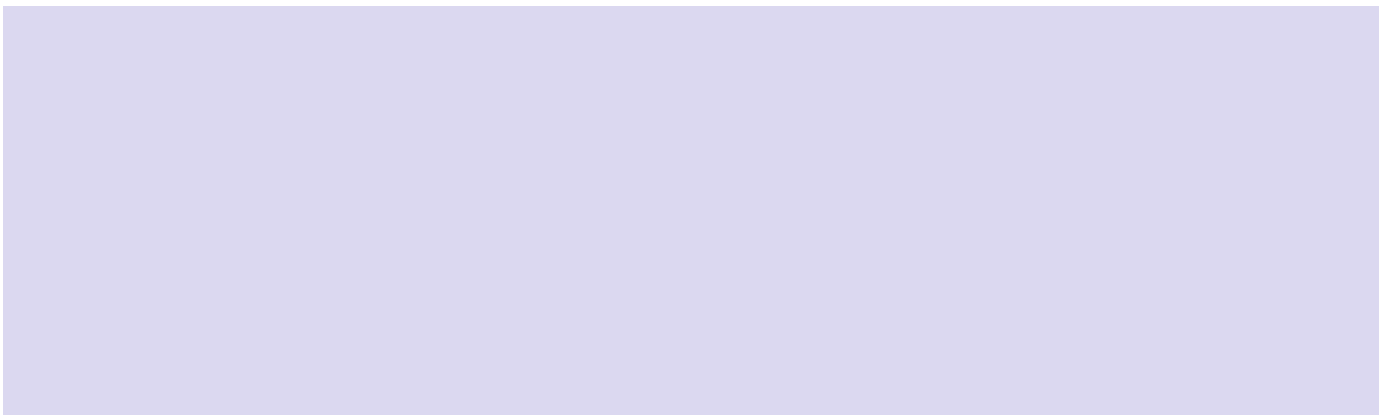

1. Can you tell what the blog is about? What topics do you think are covered on this blog?
Would a first time reader know what the blog niche is?

2. Design. Does it look dated? Unprofessional? Or modern? Professional? What do you like about the design? What do you dislike?

3. Does the navigation make sense? Would a first-time user be able to easily navigate to various sections of the blog? Are the various sections labeled clearly?

4. Post quality. Are the posts informative and useful? Do they reflect an understanding of the audience? Are there noticeable grammar errors?

5. Is there a clear call to action? What would you first do as a reader landing on the front page of the site?

6. Fonts and graphics. Can you easily read the font? Are the graphics engaging and appropriate to the posts? Is the header graphic and/or logo professional and easily read?

7. What would you change? Please be bluntly honest! I want to improve my website.
